

Two Great New Products

Innovative Damper Solutions

www.tamco.ca

- Thermally insulated dampers
- Thermally broken frame dampers
- Saltwater resistant dampers
- Back draft dampers
- Extreme cold temp. dampers
- Weighted dampers

Tamco dampers are the industry leader in the construction of extremely high quality dampers. Available with Silicone or EDPM seals, totally maintenance free Celcon blade bearings, all aluminum construction and other features not found in other products.

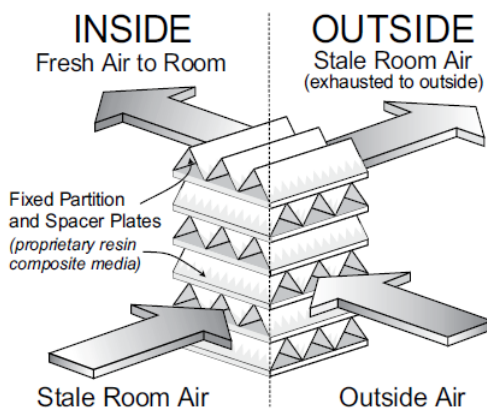

Low leakage and thermally broken blades and frames reduce wasted energy. No required maintenance means ease of ownership. Highest construction quality means peace of mind for the engineer, contractor and building owner.

Plate Core Energy Recovery Vents

www.renewaire.com

- Positive airstream separation
- No condensate or active defrost
- Easy maintenance
- 10 year core warranty
- ARI certified performance

For over 30 years, RenewAire has been a pioneer in the use of plate exchangers that simultaneously transfer heat and humidity between ventilation airstreams in extreme climates. From cool-dry to hot-humid climates, RenewAire exceeds customer expectations for effective, reliable ventilation solutions.

Models are available from 50 to 20,000 CFM, and panelized versions are available in unlimited CFM. Dedicated outside air units available from 500 CFM to 4400 CFM.
